Byron,  
I meant to cc you on the email below. My apologies.

**Contains Confidential Business Information**

Mark,

As you requested, here is the document we want to walk through with CARB and EPA on Monday from **9:00 – 10:30 Pacific**.

This is the document that Annette requested, which provides an overview of the changes to the AECD document we submitted in August. Specifically, this document is a redline that compares line-by-line all of the changes between the AECD document we submitted in August 2016 for the initial MY2017 Sprinter prototype, and the new document that was submitted on February 24 for the updated MY "2017 Improved" version of the Sprinter. In addition to the redlining or tracked changes, we also included text boxes in the margins with additional explanations.

CBI / Ex. 4

**CBI / Ex. 4**

“plain language” descriptions, as CARB requested in our November and December meetings, and there were simply too many changes to make the redline readable.

In addition to the AECD overview, we also hope to present additional detail on the off-cycle test data we have collected on the latest MY 2017 Sprinter.

This Friday afternoon, our Los Angeles Technical Center got an email from John Ng with 32 technical questions in it. The company is currently working on providing answers to the questions, however, many of them relate to either the 2015 Sprinter, or the earlier prototype of the MY 2017 Sprinter. We will prioritize providing answers to the questions that relate to the MY 2017 Improved Sprinter, which is the one we are seeking certification for.

# CBI / Ex. 4

Finally, please note that these attached materials are confidential, and are being submitted to ARB & EPA under a request for confidential treatment, and should get the benefit of all applicable California Public Records Act and FOIA disclosure exemptions.

Best Regards,

Latane

Thanks Latane,

Is there any chance you can send the docs this Friday?

Mark,

This time will work. I think we should only need 1 1/2 hours for this initial kick-off meeting. As Jackie suggested, we want to use this initial meeting to highlight the new information in the AECD, explain how it is laid out, and provide a basic overview of the new format. This should be doable in 1.5 hours.

We would expect to respond to more detailed technical questions after CARB and EPA have had a chance to spend more time with the document, and with more notice we will be able to determine which experts we need to bring to California, or the next call, etc. For Monday's meeting, Ashim Manchanda and Gary Wong will attend in person, and the other MB attendees will dial-in.

I will send out a calendar invite for **9:00-10:30 Pacific**, with the dial-in information, which you can forward to your team as appropriate.

Thank you for helping to organize all of this, we really appreciate it.

Best Regards,

Latane

**Subject:** Next Meeting

Hi Latane,

Following up on our last meeting, I wanted to offer March 6, 2017 from 9-12 PDT here in El Monte as the next time and place to continue or discussions. EPA is ok with the date and will call in or link by video. I would also like to ask that MB set up the call in number. I can be reached at 626-634-9030 if you have any questions.Thanks
